

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the Application:

1. (Currently Amended) A method for making a multi-ply tissue paper product from at least two tissue paper webs, said method comprising the steps of:
 - passing said at least two tissue paper webs through an embossing nip formed between a first and a second embossing roll, wherein at least one of said embossing rolls comprises at least 30 embossing elements per square centimeter and whereby said embossing nip fixably attaches at least a first portion of a first tissue paper web of said at least two tissue paper webs to at least a first portion of a second tissue paper web of said at least two tissue paper webs;
 - calendering both of said at least two tissue paper webs wherein said calendering step is adapted to increase a caliper of said multi-ply tissue paper product by at least about 10 percent compared to the caliper of an unembossed and uncalendared paper web; and,
 - applying a transferable lotion to at least a first side of said multi-ply of said tissue paper product such that said tissue paper product is adapted to transfer a first quantity of said transferable lotion upon stationary contact with a glass surface and transferring a second quantity of said transferable lotion upon dynamic contact with a glass surface, wherein said second quantity is at least 2 times greater than said first quantity.
2. (Original) The method according to claim 1, wherein least one of said embossing rolls comprises at least 50 embossing elements per square centimeter.
3. (Original) The method of claim 1, wherein said embossing elements have a height of less than 0.5 mm.

Appl. No. 10/619,656
Docket No. CM2504RQ
Amdt. dated December 10, 2007
Reply to Office Action mailed September 29, 2007
Customer No. 27752

4. (Original) The method of claim 1, wherein said first embossing roll has a web contacting surface comprising a rubber material and said second embossing roll has a web contacting surface comprising a hard material.

5. (Original) The method of claim 1, wherein in that said step of applying a lotion to at least portions of said tissue paper web is carried out after said step of passing said tissue paper web through an embossing nip.

6. (Original) The method of claim 1 further comprising a step of cutting sheets as to provide paper tissue products.

7. (Original) A tissue paper product made according to claim 1.

8. (Cancelled)
